

### ***The Mysteries of Healing: Dialogues with Doctors and Scientists***

reports on the current research and personal characteristics of 19 visionaries from the US, Canada, and the UK. They discuss healing with hands, with frequencies, with altered states of consciousness, and with helpful beings.

Vanguard scientists believe there is more than we see and are formulating a non-materialist paradigm that expands human potential, including mind and matter interaction. We learn that there are other dimensions that allow for enhanced abilities, based on extensive interviews by Gayle Kimball.

---

*How often are we privileged to enter the minds and hearts of visionary scientists working at the cutting edge of exploration?*

**Gary E. Schwartz, Ph.D.**, Director of the Laboratory for Advances in Consciousness and Health at the University of Arizona.

*Dr. Gayle H. Kimball has succeeded in bringing together a great variety of viewpoints, in a variety of fields, all lively while deep, through her interviews of many professionals. The Mysteries Trilogy will remain an amazing way to gather information, belief systems, and everyday life stories of many remarkable people, while keeping high professional standards. She herself is a remarkable individual and the hard work she carried out shows in the writing.*

**Menas Kafatos, Ph.D.**, physics professor and author.

*This informative trilogy offers a treasure trove of personal reflections and insights from many of the leading figures in the modern scientific awakening to deeper understanding of consciousness, the brain-mind connection, and the ultimate healing force of our free will.*

**Eben Alexander, M.D.**, neurosurgeon and author of *Living in a Mindful Universe* and *Proof of Heaven*

**Gayle Kimball, Ph.D.**, is the Nautilus award-winning author of 20 books and offers clairvoyant sessions and workshops.
